

Mechanical Engineering

Edinburgh College

Venues

Online only

Content

On this course you will learn a range of modules including Thermofluids and Engineering Principles. These will be taught at a high level allowing you to develop transferable skills which are essential for your future engineering career.

This course is fast-tracked and will be taught two evenings a week over two years. Each evening session lasts two and a half hours and is delivered online through programmes similar to Skype. The software used is exclusive to Edinburgh College and includes a virtual whiteboard system for you to use and participate in the class.

This course combines engineering techniques with hands-on learning. You will learn the skills required to solve mechanical engineering problems in a wide variety of industries such as; traditional energy, renewable energy, manufacturing, transport and materials. The course is taught by staff with extensive industry experience using the latest industry technologies. You will be taught between classrooms and online workshops where you will gain essential hands-on experience in the engineering sector. This course is intended to meet the requirements of employers and universities.

Start Date

August

Qualification

HNC

Study Method

Online learning

Course Length

2 years

Department

Engineering

Entry Requirements

Higher Maths and Physics; or NC Engineering Systems (Level 6); or other relevant national qualifications at SCQF Level 6

SCQF Level

7
