

Petroleum Engineering

Fife College

Venues

Glenrothes (Stenton) Campus

Content

This course is for those looking to work in the exciting world of petroleum discovery and recovery. It has been designed to meet industry demand for a skilled workforce to work on oil/gas production platforms. You will find out about locating, extracting, and purifying the oil and gas before it is delivered to the refineries.

This course is suitable if you are seeking employment in the industry as well as providing underpinning knowledge for the existing workforce. The course content will prepare you for a number of jobs in production and exploration such as drilling engineering, mud logging, control room operation, and process engineering exploration.

Start Date

September

Qualification

HNC

Study Method

Full time

Course Length

1 year

Department

Engineering, Energy and Mathematics

Entry Requirements

Higher Maths and one from Chemistry, Physics or a technological subject; or Foundation Apprenticeship Engineering; or NC Mechanical Engineering; or NC Engineering Systems; or other relevant national qualifications at SCQF Level 6. Interview.

SCQF Level

7

Progression Routes

Relevant HND or degree courses

Address

Pittsburgh Road
Dunfermline
KY11 8DY
