Computing and IT (Communications and Software)

Open University in Scotland

Content

In this specialist route through the BSc (Honours) Computing and IT (Q62), you'll gain an understanding of software engineering concepts and a view of practical software development. You'll achieve a sound understanding of the principles of hardware- and software-based technologies, and the ability to apply your knowledge and skills in a broad range of industries and organisations. You'll learn about well-known software development processes and their phases; and activities and techniques that will help you to develop a critical understanding of the diversity of contexts of organisations, problems, and development teams.
