

Environmental Science (Environmental Management)

Open University in Scotland

Content

This course is a specialist route through the BSc (Honours) Environmental Science that focuses on environmental management. It's an interdisciplinary course that combines aspects of biology, ecology, geography, chemistry, technology, management and social science to help you understand environmental situations from all perspectives. You'll develop the scientific and technical knowledge and skills required to investigate ecosystems, understand fundamental environmental patterns and processes, and address local and global environmental issues. In addition, you'll study the problems we face in understanding our natural environment and living sustainably.
