

Aircraft Maintenance Engineering and Management

University of the Highlands and Islands

Venues

Perth College UHI

Content

This unique new course is the only one of its kind in Scotland and is designed to produce graduate-calibre aircraft maintenance engineers.

The course meets the requirements of the European Aviation Safety Agency (EASA) category B1 or B2 aircraft maintenance engineering licence syllabus (Part-66). Delivered in conjunction with AST, the oldest aviation training organisation of its type in the world, it provides you with the opportunity to obtain a training certificate in addition to an honours degree.

This will reduce the amount of live aircraft work experience you must obtain before applying for a category B, aircraft maintenance engineer licence. Obtaining a category B licence is the first step on the path to becoming a certifying, licensed aircraft engineer, a person responsible for signing-off (certifying) the work carried out on aircraft and their systems and equipment.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

H410

Course Length

4 years

Entry Requirements

3 Highers at BCC including Maths at B (Physics or Engineering Science at B if Maths not held at B) plus National 5 Physics at B and English necessary; or Foundation Apprenticeship Engineering or relevant national qualifications at SCQF Level 6.

Entry to year 3 may be possible with an approved EASA Part-66 Category B qualification; or a full Category B Licence.

SCQF Level

10

Progression Routes

Postgraduate course
