### Content

Philosophy seeks to understand, and particularly to question, ideas concerning the nature of reality, value and experience that play a pervasive role in understanding the world and ourselves. The philosophy discipline focuses on problematic concepts, such as existence, reason and truth, which occur in every sphere of human enquiry, but more specifically on problematic concepts that belong to particular areas of thought and practice, such as politics, economics, religion, science and ethics.

Throughout the course you will apply analytical and critical thinking to a range of 21st century issues such as: Is humanity headed in the right or wrong direction? What is the best way for a person to attain happiness? Will religion ever become obsolete? What is the future of artificial intelligence? Is there a meaning to life and, if so, what is it?
