

Medical Ultrasound

Glasgow Caledonian University

Content

With flexible study options tailored to your area of practice, GCU's MSc Medical Ultrasound gives you the theoretical foundation and real-world experience you need to improve not only your own work – but your field at large.

Using state-of-the-art simulation facilities (MedaPhor ScanTrainer) and sonographic equipment (GES8), our multidisciplinary team of academic experts and clinical specialists will coach you in safe and effective medical ultrasound practice. You'll rehearse your skills in a setting that prepares you for real-world practice and get instant feedback that's specific to your field.

Accredited by the Consortium for Accreditation of Sonographic Education (CASE), your programme will draw on industry best practice for a curriculum that is both evidence-based and varied – with lectures, workshops, simulations, seminars and case studies to help you learn. And at GCU, you'll get a world-class education that also contributes to the common good – through critical evaluation of research, professional discussion and debate designed to help promote innovation in the field.

You can exit after stage 1 with PgCert Medical Ultrasound

You can exit after stage 2 with PgDip Medical Ultrasound

Start Date

September, January

Qualification

Postgraduate Master's
