

Advancing Practice in Community Health and Wellbeing (Advancing Practice in Health Framework)

Queen Margaret University

Content

The community health and wellbeing pathway aims to facilitate the development of knowledge and practical skills required to reduce inequalities and improve the health and wellbeing of communities.

Delivered online, there are learning opportunities in areas such as community health and wellbeing theory, realistic lifestyle medicine, delivering impact in practice as well as a number of other modules such as fundamentals of advancing practice and enquiry-based practice.

The Framework also offers opportunities to draw on expertise across the University on subjects such as leadership, social science and education.

The Community Health and Wellbeing award pathway aims to foster and develop QMU's vision of ideas and influence and its mission of cultivating intellectual capital with both a theoretical and practical focus. Learning and teaching is underpinned by research, evidence and scholarship against a background of the current and evolving political and social landscape for health and wellbeing. The Community Health and Wellbeing award pathway offers flexibility in modes of study (part-time, full-time, workplace) that are responsive to individual needs and today's culture of work and learning.

You can exit with a PgDip or MSc.

Start Date

September, January

Qualification

Postgraduate Master's
