Content

This course will underpin theoretical knowledge and clinical skills. It will enable you to practice autonomously, to assess, diagnose and manage undiagnosed, undifferentiated and complex clinical presentations, in an evidence based, safe, effective and person-centred way.

You will develop your knowledge and skills in advanced practice, by undertaking a range of modules based on the four pillars of Advanced Practice: Clinical Practice; Facilitation of Learning; Leadership and Evidence; Research and Development.

You will undertake four taught modules that will expand your thinking and expertise in current and clinically focused topics. After completing these four modules you will progress to your dissertation and you will be allocated a supervisor. The NMP module is accredited by the Nursing and Midwifery Council and the Health and Care Professions Council.

You can exit after stage 1 with PgCert Advanced Practice

You can exit after stage 2 with PgDip Advanced Practice

Start Date

September, January

Qualification

Postgraduate Master's

Study Method

Blended learning

Award Title

MSc

Course Length

42 months

Department

Medicine, Dentistry and Nursing

Entry Requirements

You'll normally need to have a degree or equivalent and work in a health or social care related area.

Healthcare professionals from a range of disciplines will be eligible to undertake the programme. Some of the modules in the programme require students to be working in a clinical area where they can develop their skills and knowledge to complete the required competencies.

SCQF Level

11
