

Earth and Planetary Observation

University of Stirling

Venues

Stirling Campus

Content

This is the only MSc in the UK to combine Earth observation and space exploration. The course is a response to the growing investment in the space sector, and the increasing need by industry for trained individuals to exploit remote sensing tools.

Our course is highly relevant to the recruitment needs of employers and offers a range of career opportunities in the space sector with unique focus on environmental, heritage and resource management sectors.

This course provides a thorough scientific grounding in remote sensing and professional training in geospatial technology and programming, with a unique focus on environmental applications and space exploration.

You can exit after 18 months with a PgDip

You can exit after 12 months with a PgCert.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Part time (day)

Award Title

MSc

Course Length

24 months

Department

Natural Sciences

Entry Requirements

A minimum of a second class honours degree or equivalent in a numerate subject such as geosciences, geography, environmental sciences, physics, engineering, mathematics is required for entry to this course.
