Content

The care of critically ill patients is a challenging and highly specialised area of health care practice. The polio pandemic in the 1950s led to the birth of the modern Intensive Care Unit (ICU).

Another pandemic (Covid-19) has seen the term 'ICU' rise to prominence once again as the area in hospital where the most severely ill patients are cared for. Critical Care is a term that is repeated daily in the media.

It is the specialty we practice and are passionate about, and the area of health care we are dedicated to teaching at the University of Glasgow.

You can exit after 12 months with PgCert Clinical Critical Care

You can exit after 24 months with PgDip Clinical Critical Care

Start Date

September, January, April

Qualification

Postgraduate Master's

Study Method

Distance and Flexible learning

Award Title

MSc
