

Applied Physics

University of Strathclyde

Content

The course gives you the opportunity to explore and master a wide range of applied physics skills. It also teaches you transferable, problem-solving and numeracy skills that are widely sought after across the commercial sector.

Two semesters of taught classes are made up of compulsory and optional modules. MSc students also undertake a three-month research project. You can choose classes relevant to your career interests from a wide range of topics including: high-power microwave technology; laser-based particle acceleration and enabled applications; physics and the life sciences; materials and solid state physics; photonics; quantum optics and quantum information technology.

You can exit at the end of 21 months with PgDip Applied Physics

Start Date

September

Qualification

Postgraduate Master's

Study Method

Part time (day)

Award Title

MSc

Course Length

24 months

Faculty

Faculty of Science

Department

Physics

Entry Requirements

First or second-class Honours degree in Physics or a related subject.

SCQF Level

11
