

Sustainable Engineering: Offshore Renewable Energy

University of Strathclyde

Content

The Faculty of Engineering runs a multi-disciplinary postgraduate course entitled Sustainable Engineering with a number of different themes, one of which is offshore renewable energy.

This flexible programme combines study in specialist, advanced engineering technologies underpinned with training in sustainability. The programme has been developed with direct industrial involvement to provide you with a solid understanding of modern, sustainable engineering. As well as gaining an understanding of how sustainable engineering applies to offshore renewable energy, this programme will also provide you with key transferable skills to aid your employability.

You can exit at the end of 21 months with PgDip Sustainable Engineering: Offshore Renewable Energy.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Part time (day)

Award Title

MSc

Course Length

24 months

Faculty

Faculty of Engineering

Department

Naval Architecture, Ocean and Marine Engineering
