

Paramedic Science

University of Stirling

Venues

Stirling Campus

Content

Paramedics have a highly responsible role using their skills in a range of emergency and non-emergency situations. You'll be one of the first healthcare professionals to arrive at the scene and we'll ensure you're ready to help others in their moment of need.

The University of Stirling has collaborated with the Scottish Ambulance Service so that the BSc Paramedic Science degree teaches you the skills and competencies you'll need for the autonomous and dynamic role of a paramedic. They are experts in health education and recognised internationally for their research into out-of-hospital care. The BSc Paramedic Science degree will teach you the full scope of Paramedic Science practice so you meet the requirements to become a registered Paramedic with the Health and Care Professions Council (HCPC).

Start Date

September
