Computing Science

Robert Gordon University

Content

The MSci Computing Science course has been designed to create modern software developers who can use their knowledge and skills to create solutions to real-world problems. This 5-year course results in a Master's level qualification with a key feature being the year-long industrial, research or study abroad placement.

You will learn to develop software across a number of modern platforms, including desktop, mobile, web and embedded systems, and gain skills in a variety of modern programming languages. You will be able to adapt to the changes and challenges that working with cutting-edge technology brings, and design and test secure software systems, all in our custom-built teaching labs. This course provides you the confidence and creative and adaptable skillset that the computing industry needs.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

MSci

UCAS Code

G402

Course Length

5 years

Department

School of Computing, Engineering and Technology

Entry Requirements

2027 entry requirements

Standard entry: 4 Highers at BBBB plus English and Maths at National 5 (if not held at Higher).

Widening access entry: 4 Highers at BCCC plus English and Maths at National 5 (if not held at Higher).

SCQF Level

11
