

Introduction to Construction Skills (City and Guilds)

West Lothian College

Content

This City and Guilds course is for those thinking about a career in construction. It is an ideal course for school leavers to develop skills such as plumbing, tiling, electrical installation, brickwork, decorative painting, carpentry and joinery. It includes classroom and workshop-based activities and supports students on to further study or employment.

You will develop skills and knowledge in various disciplines within the construction industry, including practical skills in a workshop environment.
