

Construction Technology - Built Environment

West Lothian College

Content

This course is for prospective students, keen on a professional role in the construction industry, or for experienced construction operatives, who are looking to up-skill and enhance their promotion prospects.

The course focuses on the key knowledge required by a construction technician, site supervisor/agent/manager, to provide a strong grounding in construction methods, procedures, organisation and contractual arrangements.

You will learn contemporary technical roles, currently required by the construction industry:

Substructures; Domestic Construction; Construction Site Surveying; Modern Methods and Sustainable Construction; Structural Mechanics; Building Science.

Attendance: Monday 9.00am - 4.15pm.
