Content

From Finance to Social Media, the world revolves around Data insights and analytics! In order to remain relevant and competitive in all industries, businesses today must rely on data science to analyse their large sets of data and draw out performance boosting insights. In fact, data science is so highly sought after that last year alone, there was expected to be nearly 3 million new job postings for professionals with data science and analytic skills.

The BSc (Hons) Data Sciences programme is taught by market leading Data Scientists. The programme is designed to help you get a head start in this innovative career and will teach you the technical and analytical skills to navigate through data fields, as well as how to extract valuable insights from the vast amounts of data available to you.
