

## Games Development (Level 6)

Edinburgh College

### Venues

Granton Campus

### Content

Computer Games Software Development NC is designed to teach you all aspects of computer game development. You will learn fundamental skills in subjects such as Software Development, Animation, Graphic Design, Coding, and the technology behind computer games.

The UK, and Scotland in particular, has built a strong computer games industry and is seen as a global leader in the sector. The industry is a major contributor to the UK economy. The industry is seeking job-ready graduates with specialised skills and a solid understanding of production processes, game software (including animation and programming), as well as the essential soft skills required to succeed in the industry.

### Start Date

August

### Qualification

NC

### Study Method

Full time

### Course Length

1 year

### Department

Computing

### Entry Requirements

Higher Computing Science or a numerate subject preferred plus 6 subjects at National 5 including Maths at B. Interview.
