Psychology

University of Dundee

Venues

City Campus

Content

You will learn about the very diverse range of topics that together form the subject of psychology.

Amongst others, you will learn about how babies learn, what happens to people's mental skills when they get old, how people's personalities differ, how social group dynamics work, how we remember, see and hear things and how we talk to each other, and about different psychological disorders.

You will be taught by international experts about the latest developments in each of these areas. Your understanding of these psychological aspects of human nature will be supported by learning how to think critically, how to solve problems, analyse data, write clearly and effectively, and be a confident communicator of science; these are skills that are highly valued by employers. You will learn about the scientific method, eventually planning and implementing and analysing your own research project.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

C800

Course Length

4 years

Faculty

School of Humanities, Social Sciences & Law

Department

Psychology

Entry Requirements

2027 entry requirements:
4 Highers at BBBC (BBCC for widening access entry).

SCQF Level

10
