

Mechanical Engineering Pathway

Glasgow Caledonian University

Content

Study the design and manufacture of engineering systems at degree level and progress to become an Engineer who can function within a multi-disciplinary professional engineering environment.

If you enjoy being hands on with technology and creating solutions to complex problems, you should consider mechanical engineering. Learn to design and manufacture mechanical products to degree level and excel in this field.

Engineers are involved in a number of design and development activities and this course make you a well-rounded engineer able to exercise leadership, initiative, personal responsibility and decision-making in complex and unpredictable situations. This course offers the option to specialise in Systems or Design.

You will study at a partner college for years 1 and 2.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

H370

Course Length

4 years

Faculty

School of Computing, Engineering and Built Environment

Department

Mechanical Engineering

Entry Requirements

2026 Entry Requirements:

2 relevant Highers at BB including Maths or a science subject.

SCQF Level

10

Progression Routes
