

Wildlife and Conservation Management

Scotland's Rural College (SRUC)

Venues

Aberdeen Campus
Barony Campus
Edinburgh Campus

Content

Biodiversity conservation, species and habitat identification, visitor management and land use are all included in this dynamic, hands-on course taught by enthusiastic professionals with direct experience in the land based industries.

The course offers flexibility, allowing you to choose modules to suit your particular aspirations, and you'll put the knowledge you gain to good use through real-life scenarios and case studies. This course attracts students of many different ages, backgrounds, and future aspirations. What they all have in common is an interest in studying this unique mix of biodiversity, conservation ecology and people management topics.

Content includes: Community Project Management; Multi-Purpose Woodland Management; Ecological Principles and Applications; Rural Planning; Environmental Impact Assessments; Management, Innovation & Entrepreneurship.
