

Mathematics and Psychology

University of Dundee

Venues

City Campus

Content

Level 1: provides an introduction to psychology as a method of scientific enquiry. The course focuses upon these core themes: social behaviour, cognitive processes, and human abilities and personality. During Level 2 you will learn about more advanced research methods, and classes will introduce you to further central themes in psychology: perception and development, neuropsychology and language. Levels 3 and 4 programmes are designed to consolidate and extend your knowledge of the core topics covered in the first two Levels. You may also take various optional subjects depending on your interests.

Start Date

September

Qualification

Degree

Study Method

Full time
