Geography and Environmental Science

University of Dundee

Venues

City Campus

Content

You will focus on topical and relevant issues such as climate change, pollution of land and water and the management of natural resources.

In Environmental Science, you will gain the knowledge and skills to help build a cleaner future and address the large-scale challenges facing human existence on earth.

In Geography you will study both social and physical sciences across three broad themes: creating just communities and places, shaping environmental futures, and geospatial and digital methods.

You will also have the opportunity to go on field trips, and to work with partner organisations to help them solve problems that they are currently facing.
