

IT in Business - Databases

North East Scotland College

Venues

Off campus

Content

This Unit is designed to provide candidates with the knowledge and skills for further study or employment in an administrative or IT environment. It introduces the database as a tool to help store, process and produce information in such a way as to be relevant to a manager and thus assist with management decision-making. Initially, you will focus on the analysis of a business problem, then the design and use of a database to collate data and turn it into information. On completion of the Unit you will be able to:

Design a relational database structure from source documents; Modify and store data using a relational database; Query and present information to aid decision-making.

Credit points and level: 1 HN credit at SCQF Level 7: (8 SCQF credit points at SCQF Level 7)
