

Editing and Production for the Media Industries

Edinburgh College

Venues

Sighthill Campus

Content

The areas covered include audio acquisition and editing, and working with video and digital imaging. This will give you a range of experience and skills that you need to progress to a Higher level course. Team working is core to the media industries, and you will have the opportunity to work as part of a group of like-minded people to produce a range of media and start putting together a portfolio of your work.

You will learn:

Understanding the Film and Television Industry; Intro to Digital Still and Moving Images;

Digital Media Job Opportunities; Basic Video Camera Operations; Introduction to Radio and audio recording
