

Advanced Chemical Engineering

University of Strathclyde

Content

This course is aimed at engineering graduates from the UK and overseas who want to develop careers in the oil, gas, process and chemical industries. The course has a strong project-based approach and is relevant to the recruitment needs of a wide range of employers.

This course is one of the few MSc programmes to offer the module Safety Management Practices. It offers exposure to best industry practice and much required industrial training.

It meets accreditation requirements for the Institute of Chemical Engineers allowing graduates to apply for chartered engineer status.

Start Date

September, January

Qualification

Postgraduate Master's

Study Method

Full time

Award Title

MSc

Course Length

12 months

Faculty

Faculty of Engineering

Department

Chemical and Process Engineering

Entry Requirements

An Honours degree, or equivalent, in a relevant engineering, technology or science discipline.

SCQF Level

11
