

Certificate in Computer Technology with Cyber Security

Dundee and Angus College

Venues

Gardyne Campus

Content

Technology affects the way we live, socialise and play. Computing and IT skills are essential in today's workplace. This Certificate course will give you a starting point for a wide variety of computing-related careers.

The main focus is teaching learners key skills such as programming, web development and team-work. It also looks at Cyber Security where learners will develop technical skills in network security and ethical hacking. This is a full-time course which includes classes, practical tutorials, project work and self-study sessions.
