

Cyber Security

New College Lanarkshire

Venues

Motherwell Campus

Content

In this fast-paced digital age, the security of information is critical across all sectors and industries. Recent security breaches have been widely reported and reinforce the importance of Cyber Security. The Scottish Government has identified digital skills as a key area for future investment and employment.

You will develop existing knowledge and skills in the analysis of current trends in cybercrime, penetration testing on computer systems, digital forensics processes, evaluating digital evidence and creating security strategies for small businesses.
