Content

User Experience (UX) Design is a creative dynamic discipline that encourages curiosity creatively expressed through the voice of people. This exciting course encourages you to explore the world of interaction design and user experience with devices and systems.

This user experience design course will develop your skills in identifying unmet needs and defining them by incorporating them into the process of design.

The course will ingrain web user experience design principles into the students and prepare them for a career in the industry. If you have an insatiable curiosity to speculate on the future and understand people's experience as they interact with devices and systems - then this course is for you!

During your studies, you will develop an impressive portfolio of work that you can easily use for applying to a broad range of user experience jobs.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

I104

Course Length

4 years

Department

Computing
