Computing and IT and a second subject

Open University in Scotland

Content

Shape your degree around your passions and career ambitions. With this flexible qualification, you'll combine Computing & IT with a second subject such as business, design, mathematics, psychology or statistics. Split your time equally between the two areas, building strong digital skills while gaining valuable expertise in another discipline. Whether you're interested in applying IT to business challenges, exploring human behaviour, or the applications of design thinking, this degree lets you tailor your studies to create a unique combination that stands out to employers.

Start Date

October, February, April

Progression Routes

On successful completion of the required number and type of modules you will be awarded a Bachelor of Science (Honours) Computing and IT degree. Depending on which modules you choose the Computing and IT degree may help you to obtain professional recognition from BCS – the Chartered Institute for IT, or from the Institution of Engineering and Technology (IET). Both are professional bodies established by royal charter.
