

# Geography

Open University in Scotland

## Content

Geographical thinking is now fundamental to how we understand and might respond to the most pressing issues of the twenty-first century such as climate change, social inequality, migration and urbanisation. By studying how places, policies and landscapes are being made and reinvented in a changing world, this degree will equip you with a deep understanding of the social, cultural, economic and political processes transforming our human and natural environments. Developing your geographical imagination through innovative virtual fieldwork, you'll gain the knowledge and skills to investigate, analyse and communicate how geography matters in our everyday lives as you work towards an independent research project to complete your degree.

## Start Date

October, February

## Qualification

Degree

## Study Method

Online learning

## Award Title

BA Hons

## Course Length

Flexible

## Faculty

General

## Department

Geography

## Entry Requirements

There are no formal qualifications required to study this degree. Computer and internet access required.

If you're new to study or to the OU, it is recommended that you start with a course at Level 1.

## SCQF Level
