

Oral Health Science

University of the Highlands and Islands

Venues

Inverness College UHI
Virtual Learning Environment (VLE)

Content

The exciting and innovative MSc Oral Health Science is the first of its kind. A customised programme for qualified, registered dental therapists, it will also be of direct relevance and interest to other clinical dental professionals, including dentists.

Clinical topics include periodontology, paediatrics, prevention, and direct restorations, as well as subjects related to leadership, management, and communication. Through focused research at Masters level, you will gain the skills and opportunity to develop your role in the evolving dental teams of the future.

The course is designed to provide innovative education by using online delivery whilst linking closely to your clinical practice within your professional setting. There is a particular focus on studying treatment approaches for patients with extensive periodontitis, as well as the treatment of children, especially those who may be anxious.
