

Light Vehicle Maintenance and Repair (VRQ) Level 3

West Lothian College

Content

There will be an opportunity to develop practical skills in a workshop environment, and develop knowledge and understanding of principles in the classroom.

The course will give you the skills and knowledge in:

Diagnosing and repairing chassis systems, engine systems, transmission systems and electrical systems; Emerging technologies such as hybrid and electric vehicles, awareness, safe practice and routine maintenance when working with Electric and Hybrid vehicles – low and high voltage systems; Knowledge and understanding of Air Conditioning systems; Health and safety; Communication, information technology, problem solving, team-working and numeracy; Work experience, placements, visits to industry and visits from experts.

This course will also give you a more depth insight into the mechanical working surrounding these areas and the interaction between component parts and systems.
