

## IT for the Energy Industry

Robert Gordon University

### Content

The course will prepare you for a career in the design and implementation of IT solutions and service management. As a graduate, you will be well-positioned for a computing career in the ever-evolving global energy industry and its IT providers.

This course provides training in software development tools and techniques, IT service management and geoscience, including renewable energy.

Throughout the course, content is complemented by practical work, undertaken in state-of-the-art facilities, using tools and techniques to allow you to gain the skills required to work within a technical IT environment.

This practical element will enhance your theoretical understanding by developing real-world problem-solving skills; enhancing your employability as a graduate.

You can exit after Stage 1 with PgCert IT for the Energy Industry.

You can exit after Stage 2 with PgDip IT for the Energy Industry.

### Start Date

September, January

### Qualification

Postgraduate Master's

### Study Method

Part time (day)

### Award Title

MSc

### Course Length

28 - 36 months

### Department

School of Computing

### Entry Requirements
