

## Education Futures

University of Edinburgh

### Venues

Central Campus

### Content

Education, in all its forms, is essential to a thriving society. How organisations, systems and people learn and change profoundly affects our lives, our surroundings and our futures. This MSc is a bold new programme for those who wish to engage critically with educational possibilities for the future, and understand how educational knowledge, organisations, spaces and relationships can positively shape societies.

The EFI Education Futures programme is designed to respond to the need for creative, critical and experimental thinking across education in schools, universities and colleges, and learning within communities, industries and organisations. Some of the issues you will explore include mobility, politics, environmental change, culture, social justice and how data-driven systems for managing and understanding the world influence learning and education.

You can exit after 2 years with a PgDip Education Futures.

You can exit after 9 months with a PgCert Education Futures.

### Start Date

September

### Qualification

Postgraduate Master's
