

Structural Engineering

University of Glasgow

Venues

Gilmorehill Campus

Content

Structural engineers ensure that buildings and infrastructure are safe to use and can resist natural and human made disasters. This MSc in Structural Engineering is ideal for those who have an engineering undergraduate degree and would like to specialise at Masters Level, providing you with a range of methods that will help you to analyse and design structures so that they are safe and durable. Skills acquired within this programme are desirable for a range of industries such as civil, automotive, nuclear and aeronautical.

Start Date

September

Qualification

Postgraduate Master's

Study Method

Part time (day)

Award Title

MSc

Course Length

24-48 months

Faculty

College of Science and Engineering

Department

James Watt School of Engineering

Entry Requirements

A 2:1 equivalent degree (GPA 3.0) in Civil Engineering or Structural Engineering that contains the core modules; Structural Mechanics, Structural Design and Maths.

Applicants with a high 2:2 equivalent degree classification but 2:1 standard marks in core modules may be considered for entry.

SCQF Level

11
