

Electrical and Mechanical Engineering Systems (Level 6)

Glasgow Clyde College

Venues

Anniesland Campus

Content

This course allows you to explore two exciting disciplines in one course, giving you multidimensional problem-solving skills and a good understanding of the core principles of electrical and mechanical engineering.

Almost all employers are now looking for people who have a good understanding of both, so you'll have a real advantage when it comes to building your engineering career.

Content:

Communication core skill unit; Mathematics: Technician 1; Engineering: Applying information technology; Engineering materials; Graphical engineering communication; Electrical principles; Single and three-phase principles; Engineering systems; Engineering; Computer-aided draughting for engineers; Pneumatics and hydraulics; Programmable logic controllers; Engineering Dynamics: An introduction; Engineering Project.

Start Date

August

Qualification

NC

Study Method

Full time

Course Length

1 year

Department

Engineering Systems

Entry Requirements

3 subjects at National 5 including Maths and a science or technological subject.

SCQF Level

6
