

## Ecology and Conservation

University of Stirling

### Venues

Stirling Campus

### Content

Ecology and Conservation course will teach you the science of ecology and conservation and provide practical training in field and laboratory techniques. You will understand how animals, plants, fungi and microorganisms interact with their environment, as well as the relationship between people and the rest of the biosphere. It will also provide you with a deep understanding of the complex relationships between environments and their inhabitants. You'll learn about the policies and management strategies that aim to safeguard our biodiversity and the ecosystem services upon which humans depend.

### Start Date

September
