

Computer Aided Design and Draughting

Glasgow Kelvin College

Venues

Springburn Campus

Content

Computer Aided Design (CAD) is the two-dimensional or three-dimensional modelling of physical structures. It uses specialist computer software to create these models with precise measurements. It is used in a wide range of industries including engineering, product design, architecture and industrial design.

The use of CAD has significantly transformed many industries and it is a leading technology in design and manufacturing. It increases productivity and efficiencies, speeding up the design process and allowing for high quality and adaptable design, making industry more competitive and responsive to market demands.

Start Date

August

Qualification

HND

Study Method

Full time

Course Length

2 years

Department

Computer Aided Design and Technology

Entry Requirements

1 Higher, preferably in a technological or design subject, or Foundation Apprenticeship Engineering, or relevant national qualifications at SCQF Level 6.

SCQF Level

8

SCQF Points

«SCQFPoints»

Progression Routes

Relevant degree programme.

Combination Courses

«htmlCombinationCourse»

«htmlCombinationUCASCode»

Address

123 Flemington Street
Glasgow
G21 4TD
