

Psychology with Development and Education

Abertay University

Content

Support children and young people with your comprehensive understanding of their learning and development.

You'll study children's minds, emotions, and behaviours at different stages of childhood and adolescence, including those with divergent needs. There's a work placement option to help you put theory into practice and build your CV. You'll graduate with the knowledge and tools you need to work with and support children and young people.

The accreditation by the British Psychological Society (BPS) is essential if you want to become a Chartered Psychologist. It means successful graduates can apply for further professional training.
