

Physics

Open University in Scotland

Content

This integrated masters degree combines undergraduate and postgraduate study, developing your knowledge and skills to explore the smallest and largest scales of the Universe. You'll choose to specialise in either Astrophysics with space science or Physics. Choose from a standard, basic maths or advanced start to suit your current knowledge and understanding. Learn to objectively and quantitatively describe, analyse, test, and explain phenomena in our physical world and the wider Universe. Apply experimental, observational and numerical methods and develop appropriate mathematical and programming skills. Conclude with an original research project on a subject at the forefront of physics, astrophysics or space science.

Start Date

October, April

Qualification

Degree

Study Method

Distance and Flexible learning

Award Title

MPhys

Course Length

Flexible

Faculty

General

Department

Engineering

Entry Requirements

There are no formal qualifications required to study this degree. Computer and internet access required.

If you're new to study or to the OU, we recommend that you start with a course at Level 1.
