Sustainable Development and History

University of the Highlands and Islands (UHI)

Venues

UHI Argyll
UHI North, West and Hebrides
Virtual Learning Environment (VLE)

Content

Sustainable Development, from the local to the global, is essential if society is to tackle the challenges we currently face. With the prospect of a global climate emergency, decision-makers are grappling with understanding and responding to the corresponding pressures on our environment and society. The necessary changes will impact on every facet of society, culture and the economy, making this a critical moment to study sustainability.

History involves the study of the past to create a better understanding of the present; this course will allow you to investigate the cultural, political, social and economic links between the Highlands and Islands, Scotland and the northern European and northern Atlantic regions.

You will develop a critical understanding of the three pillars of sustainability (social, environmental, economic), learn the facts about climate change, explore the UN Sustainable Development Goals, and consider potential and emerging solutions such as the Green New Deals, the concept of 'degrowth' and the transition to wellbeing economies. You will also be introduced to the general study of history, from the medieval to the modern period, before examining, in-depth, particular topics, places, periods and themes which utilise the research specialisms of your teaching team. Through the combination of both subjects, you will consider the role of people and communities and how they shape their surroundings.

Start Date

September

Qualification

Degree

Study Method

Part time (day)

Award Title

BA Hons

UCAS Code

D44H

Course Length

8 years

Department

Science, Nature and the Environment

Entry Requirements

3 Highers at BBC including two relevant subjects.

SCQF Level

10
