Health in Social Science

University of Edinburgh

Venues

Central Campus

Content

This programme provides you with the opportunity to explore health, illness and the provision of care through the lens of the social sciences. It combines the study of the social complexities of health, its impact, and approaches to treatment through the following perspectives: sociology, social policy, psychology, geography, counselling, ethics, and healthcare provision, public health and nursing studies.

We live in a global age of increasing life expectancy, but chronic health conditions are rising and infectious disease is showing no signs of disappearing.

The programme aims to: give you practical and academic skills to help you make a positive difference in the world; expand your understanding of the social dimensions of health and illness; and prepare you to contribute to improving people's lives.

Start Date

September
