### Content

The world is facing the prospect of a climate emergency, with decision-makers grappling with how to understand and respond to the pressures on our environment and society. Sustainable development, from the local to the global, is essential if society is to tackle the challenges faced. The necessary changes will impact on every facet of society, culture and the economy: this is a critical moment to study sustainability.

To develop a critical understanding of the three pillars of sustainability (social, environmental, economic), you will study modules drawn from a range of social science disciplines such as geography, economics, politics, sociology, and environmental studies, as well as developing practical skills in research and working with communities. The modules take a critical approach to examining the historical context to development whilst looking firmly to the future drawing examples of change in action from around the globe.

As part of the BA (Hons) Sustainable Development with Gaelic Studies, you will develop a good understanding of Gaelic issues, Gaelic language, and culture, as well as elements of Gaelic history and literature. There is no requirement for Gaelic language skills on entry, you will have the opportunity to learn the language or develop your language skills depending on your starting point. The Gaelic Studies are about Gaelic, taught in English, with Gaelic language modules suitable for all levels of ability.

### Start Date

September

### Qualification

Degree

### Study Method

Part time (day)

### Award Title

BA Hons

### UCAS Code

D44G

### Course Length

8 years

### Department

Science, Nature and the Environment

### Entry Requirements

3 Highers at BBC including two relevant subjects.

### SCQF Level

10
