Vehicle Accident Repair Paint Principles (IMI) Diploma at SCQF Level 5

Glasgow Kelvin College

Venues

Springburn Campus

Content

You'll learn through a mix of hands-on practical training and supporting theory, developing the knowledge and techniques used by professionals in modern body shops. The course focuses on safe, accurate, and efficient repair methods, preparing you for progression into employment, apprenticeships, or higher-level study.

Core learning areas include:

Body Repair Techniques – removing and refitting panels, straightening body structures, and repairing damage from dings and dents; Mechanical, Electrical, and Trim (M.E.T) – understanding how body systems connect and function; Welding and Joining – developing MIG welding and resistance spot welding skills; Plastic Bumper Repair and Finishing – welding and refinishing plastic components; Essential Theory and Testing – verbal knowledge assessments and IMI online multiple-choice tests.
