

Managing Supply Chain Operations

City of Glasgow College

Venues

City Campus

Content

This course will provide you with the knowledge and skills you need to work within the operational supply chains of a business organisation. The course is delivered by highly qualified lecturers who have a wealth of experience within the industry. You'll gain insight, learning and transferable skills across all core operational areas.

You will learn through case studies, project work, research assessments, class discussions and group activities. You will also learn independently with tasks to be done in your own time, giving you flexibility with your studies.

Year 1: Supply chain fundamentals; Supply chain organisations: structures and function; Total quality management; and International physical distribution.

Year 2: Supply chain service levels: setting the standards; Supply chain business analysis; Supply chain logistics: an introduction; Creating a culture of customer care; and Business law.
