Content

This course is for those interested in pursuing a career in television/filmmaking media and who wish to develop the knowledge and creative and technical skills required for the television industry, freelance, corporate video and filmmaking.

Using industry-standard equipment in purpose-built facilities, students will learn the technical process of filmmaking – from using cameras, lighting, and sound, through to the final editing process.

Students will have an opportunity to learn After Effects, Premiere Pro, Animate, Multi-camera, scriptwriting, project management, film theory (critical analysis) and audio techniques to create a wide range of films and projects over such subjects as factual, non-factual, music videos, corporate video, scene recreations and work experience.

Students will engage in meta-skill based self-reflective evaluations and activities designed to develop skills in critique, problem solving, creative thinking, numeracy, adapting, collaborating, leading, curiosity and critical thinking. Developing transferable skills essential for the working world.
