

Artificial Intelligence

University of Edinburgh

Venues

King's Buildings Campus

Content

Artificial intelligence (AI) is the construction of artificial systems that have intelligent behaviour.

There are two main motivations for research. One is to understand natural intelligence through the use of computer models. The other provides techniques and technology for building systems capable of intelligent decisions and actions. So AI is both a science and an engineering discipline.

Applications of AI range from 'smart' controllers for household devices to computers with the ability to converse in English, play games, conduct intelligent web searches or act as the brain of a robot.

We offer a wide range of AI courses delivered by leaders in their field. You will have the flexibility to focus on the areas of artificial intelligence that interest you most.

Start Date

September

Qualification

Degree

Study Method

Full time

Award Title

BSc Hons

UCAS Code

G700

Course Length

4 years

Faculty

College of Science and Engineering

Department

Informatics

Entry Requirements

2026 entry requirements

Standard entry:

5 Highers at AAAAA (by end of S5 preferred) including Maths at A plus English at National 5. Advanced Higher Maths highly recommended.

Widening Access entry:

4 Highers at AABB (by end of S6) (BBB must be achieved in one sitting) including Maths at A plus English at National 5. Advanced Higher Maths highly recommended.

SCQF Level

10
