

## Biochemistry (with a year in industry)

University of Dundee

### Venues

City Campus

### Content

Biochemistry is the study of life at the molecular level. This can range from things like the normal functions of metabolism to DNA replication and repair. It also includes the function of proteins carrying information within and between cells.

Knowing what happens in normal cells helps scientists understand why things go wrong, and what happens when they do.

Our course curriculum is shaped by the work of our world-leading researchers to make sure you're learning the latest advances. This will also help you gain an understanding of the fundamentals of the field.

This course also allows you to spend a year working in industry, for example, in a commercial laboratory. This allows you to gain real-world skills and improve your CV. It also presents you with the opportunity to network and build relationships. These are all things that could have a positive impact on your career upon graduating from university.

### Start Date

September

### Qualification

Degree

### Study Method

Full time

### Award Title

BSc Hons

### UCAS Code

C703

### Course Length

5 years

## Faculty

School of Science & Engineering

## Department

Biological Sciences and Biomedical Sciences

## Entry Requirements

2027 entry requirements:

4 Highers at BBCC (BCCC for widening access entry) including Biology or Chemistry plus National 5 Maths, Biology and Chemistry.

## SCQF Level

10

## Progression Routes

«ProgressionRoutes»

## Combination Courses

«htmlCombinationCourse»

«htmlCombinationUCASCode»

## Address

Nethergate  
Dundee  
Dundee City  
DD1 4HN
